

NETRIX
Netting Solutions you can rely on

Warning Net • Safety Net • Utility Net • Reinforcement / Civil Net • Horticulture / Agriculture Net

Application areas:

Warning nets:

Designed to deliver optimum strength and durability, these nets can be used as a warning sign around construction sites & manholes or as a property delineator. Available in Bright Orange colour, these nets can be used to compliment fluorescent signs like Diversion, 'U' turn or Stop and other municipality applications. Our warning nets also protect underground electric cables, telephone cables, gas pipes, etc. from accidental intrusion. They are usually placed 20 cms above the cable to warn the excavator during excavation.

TFN-003 surrounds the construction site to warn the safety aspects for all passers with highly visual barrier and provides the privacy of work to the people during excavation, installations or construction process.

TFN-003 is utilized as the underground warning net during installation and laying of electricity cables, telecables, pipelines. With high visual colour it creates warning during any civil or excavation work in future.

TFN-003 fences the road construction providing warning to passers to care for safety and restricting entry in construction site of passers.

Safety fence:

Our nets can be used as a safety fence to provide visual barriers to workers, engineers and site visitors. It also maintains safety procedures and separate areas. Furthermore, our nets are stronger, rigid, highly visible, durable, aesthetically pleasing, economical and easy to maintain.

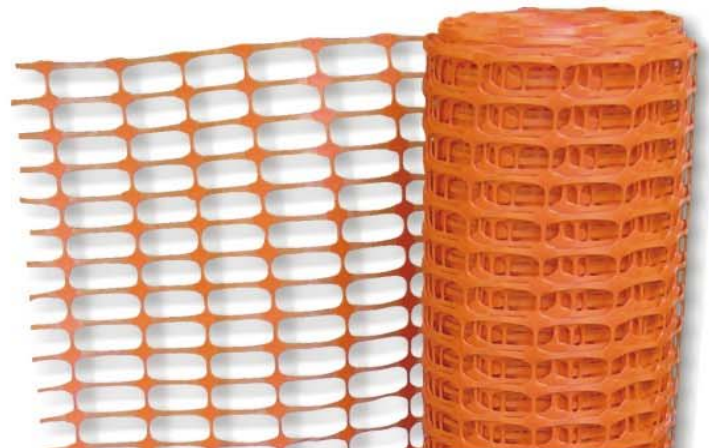

TFN-005 is a rigid net, which provides safety in building and infrastructure construction. During construction progress, these nets can be fixed on the wall / ceiling creating a barrier for humans. It can be used as a fencing net in agriculture and caging net in poultry

TFN-005 & TFN-007 used as the safety nets around the specific pieces of land, field in construction providing protection and safety against undesired trespassers. Also it can be used to segregate the areas of specific utilization

TFN-005 & TFN-007 provides protection to workers and passerby, maintain safe work site. These are strong, durable, aesthetically pleasing, economical and low maintenance.

Utility nets:

TTL's utility nets are designed for special construction categories such as fencing around parks or stabilization or rolled insulation backing, in temporary parking on sites.'

TFN-007 is the ideal alternative where welded wire has been the traditional solution. Its durability, ease of use, and other practical advantages make it a superior choice. Utility nets will not rust, rot or corrode, and will never need painting, are UV stabilized to withstand outdoor sun exposure, and stay in peak condition even in severe weather. The nets guarantee optimal visibility and allows the transfer of natural light. The applications for TFN-007 Utility nets are limitless. The product can be used for fencing around parks, properties, and farms. This product is ideal as a sports utility fence and can also be used as road barrier stabilizers and rolled insulations.

Reinforcement / Civil nets:

Our nets are widely used for road surfacing and foundation engineering as they prevent foundation material from sinking & distribute the pressure across the whole area. They offer increased bearing power due to better frictional and tensile strength. Additionally, our nets are specially designed to allow quick water dispersal and ensure good drainage. They are also used for reinforcement of slope avoiding erosion and supports vegetation.

TFN-009 used for road surfacing and foundation engineering. It prevents foundation material from sinking down. Enhances bearing power with rapid water pressure dispersal adding draining effect. It can also be used for reinforcement of parking spaces, wall plasters and reinforcement of slopes avoiding erosion and advance natural vegetation.

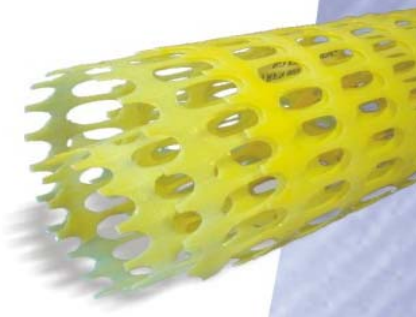

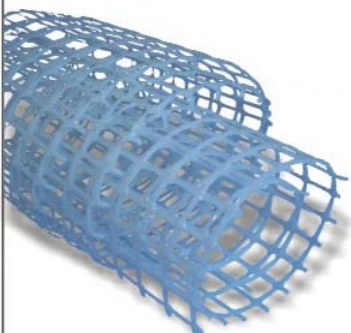

Horticulture / Agriculture nets

Our nets also support an array of horticultural and agricultural applications like anti-bird netting, garden fencing, gutter net, insect netting, etc.

TFN-007 net ensures proper ventilation, optimal climate enhancing the stem growth with its stiff and self-supporting feature. So provides safety and proper environment to trees after plantation. Can also be used as the gardening net, fencing net in agriculture/horticulture.

TFN-007 is an ideal environmental friendly plastic fence with resistance to weed-killer and fertilizers providing safety and fencing to farm and gardening.

We are Time Technoplast Ltd., one of India's largest plastic processing company backed with a history of pioneering innovative products driven with the latest world-class technology. Our passion to innovate has enabled us to emerge as trendsetters and market leaders in the field of rigid plastic packaging in less than a decades time. Today, we have achieved the distinction of possessing the largest manufacturing capacity in India with state-of-the-art production facilities strategically located across the country. Our professional interests spans across an array of diverse businesses including Rigid Industrial Packaging, Automotive Components, Lifestyle, Construction and Healthcare. Headquartered in Mumbai, we are a multi-product, profit making, dividend paying company promoted and run by dedicated professionals, ever ready to meet your needs day in and day out!

Product Features

- Light weight & easy to install
- Weather resistant
- Non-corrosive
- Durable & elegant look
- UV resistant
- Resistant to grease and oil
- High tensile strength
- Tear resistant
- High aesthetic appeal

Application Areas

- Safety and warning nets for construction sites
- Reinforcement of road surfacing
- Reinforcement of cement wall plaster
- Warning net for protection of underground cables
- Crowd control
- Snow protection
- Erosion control
- Bird protection netting
- Garden and floriculture fencing
- Agro farming
- Poultry fencing

PRODUCT CODE	MESH SIZE	MESH SHAPE	MAX ROLL WIDTH (MM)	MESH SIZE (MM X MM)	MD PITCH (MM)	TD PITCH (MM)	MAX ROLL LENGTH (Mtrs.)	COLOUR	TYPE
TFN - 003		Rectangular	2000	36.4 X 74	78	42.6	50/100	Orange	Flexible
TFN - 005		Square	2000	17.5 X 17.5	20	20	50/100	Green	Rigid
TFN - 007		Square	2000	46 X 46	50	50	50/100	Silver	Rigid
TFN - 009		Rectangular	2000	6.5 X 12	15	8	50/100	Black	Semi Rigid
